

RS Series or eS Series: Which one fits?

Rollerstop scooter racks compared. The RS Series is suited to kick scooters, the eS Series to e-scooters and kick scooters. The main difference: size of the parking slots and mounting height.

RS Series: Slot 50 x 48 mm, mounting height approx. 46 cm

eS Series: Slot 82 x 72 mm, mounting height approx. 60 cm

Feature	RS Series (e.g. RS8)	eS Series (e.g. eS5)
Suitable for	Compact kick scooters, mini scooters, kickboards; not suitable for all e-scooters	E-scooters and kick scooters, including those with a tall handlebar stem
Handlebar stem slot	50 x 48 mm	82 x 72 mm
Mounting height above ground level	approx. 46 cm	approx. 60 cm
Module lengths	RS4 (630 mm), RS6 (990 mm), RS8 (1350 mm)	eS1 (120 mm), eS3 (610 mm), eS4 (855 mm), eS5 (1110 mm)
Footprint, single-sided	approx. 135 cm x module length	approx. 190 cm x module length
Footprint, double-sided	approx. 270 cm x module length	approx. 380 cm x module length
Price per slot	from 76 € incl. VAT	from 78 € incl. VAT
Locking	Rotating locking bracket, standard padlock or bicycle chain	
Material	Galvanised steel, silver-grey	
Powder coating	Available in all RAL and DB colours, delivery time approx. 3 weeks	
Mounting	Wall bracket, screw-on floor post, hoop floor post (freestanding possible) Floor post for concreting in (approx. 20 cm, foundation size: (LxWxD) 30x30x20 cm)	
Expandable	As required by the customer, single- or double-sided	
Delivery time	7-10 days	

Who needs what:

- **Kick scooters and children's scooters only:** **RS Series** for schools, kindergartens, residential complexes. Compact, space-saving and in successful use for over 15 years. Certified by TÜV Austria since 2012 with "Gebrauchswert Geprüft" (tested for practical use).
- **Mostly e-scooters:** **eS Series** for hotels, company premises, hospitals, rental stations, public buildings and various transport hubs throughout public space (e.g. railway stations, bus and/or underground stations).
- **Mixed use:** **Recommendation 80/20 (RS Series/eS Series)**. E.g. 20 slots as 16 RS and 4 eS (2x RS8 + 1x eS4).

Parking kick scooters in the eS Series: The handlebar stem always fits – what matters is the height of the kick scooter: the eS Series is mounted at 60 cm above ground level, so scooters with a tall handlebar stem can be parked in it as well. In general, the mounting elements of the RS and eS Series can be combined modularly, but for safe parking we recommend the specified mounting heights of 46 cm or 60 cm for the respective location.
